Basis for Limits codes (these represent the original basis of the facility WLA and do not reflect trades, netting or bioavailability considerations)

A = WQMP regulation (9 VAC 25-720).

B = Permitted design capacity.

C = New facility, loading limit of zero.

Footnotes

(1) In accordance with 9 VAC 25-720.50-C., if allocations for two or more design flows are listed above for a given facility, then the allocations for the highest design flows are null and void if a Certificate to Operate at the higher design flow is not issued by 12/31/10.

(2) Wasteload allocations are contingent upon issuance of a Certificate to Operate a 0.75 MGD treatment facility by 12/31/10.

(3) For new facilities that have not previously discharged, the allocation is effective upon issuance of a Certificate to Operate. For expanding facilities, the allocation is effective as of January 1 of the calendar year immediately following the year in which a Certificate to Operate (or equivalent industrial activity) was issued at the design flow listed above.

A = WQMP regulation (9 VAC 25-720).

B = Permitted design capacity.

C = New facility, loading limit of zero.

Footnotes

(1) In accordance with 9 VAC 25-720.50-C., if allocations for two different design flows are listed above for a given facility, then the allocations for the higher design flows are null and void if a Certificate to Operate at the higher design flow is not issued by 12/31/10.

(2) Omega Protein waste load allocations based on a theoretical maximum of 198 days per year of processing operations and discharge.

(3) For new facilities that have not previously discharged, the allocation is effective upon issuance of a Certificate to Operate. For expanding facilities, the allocation is effective as of January 1 of the calendar year immediately following the year in which a Certificate to Operate (or equivalent industrial activity) was issued at the design flow listed above.

Basis for Limits codes (these represent the original basis of the facility WLA and do not reflect trades, netting or bioavailability considerations)

A = WQMP regulation (9 VAC 25-720).

B = Permitted design capacity.

C = New facility, loading limit of zero.

Footnotes

(1) In accordance with 9 VAC 25-720.50-C., if allocations for two different design flows are listed above for a given facility, then the allocations for the higher design flows are null and void if a Certificate to Operate at the higher design flow is not issued by 12/31/10.

(2) Omega Protein waste load allocations based on a theoretical maximum of 198 days per year of processing operations and discharge.

(3) For new facilities that have not previously discharged, the allocation is effective upon issuance of a Certificate to Operate. For expanding facilities, the allocation is effective as of January 1 of the calendar year immediately following the year in which a Certificate to Operate (or equivalent industrial activity) was issued at the design flow listed above.

Basis for Limits codes (these represent the original basis of the facility WLA and do not reflect trades, netting or bioavailability considerations)

A = WQMP regulation (9 VAC 25-720)

B = Permitted design capacity.

C = New facility, loading limit of zero.

Footnotes

(1) Wasteload allocations for localities served by combined sewers are based on dry weather design flow capacity. Reported discharge loads for the Lynchburg STP shall include the loads associated with the first 22 MGD of flow on each day. Reported discharge loads for the Richmond WWTP shall include the loads associated with the first 45 MGD of flow on each day.

(2) Wasteload allocations are "net" loads, based on the portion of the nutrient discharge introduced by the facility's process waste streams, and not originating in raw water intake.

(3) Hampton Roads Sanitation District TN Wasteload Allocation based on an aggregate figure of 6.0 million pounds per year for HRSD James River facilities.

(4) James River Trading Restriction - Lower James River facilities are noted by this footnote. In order to protect upstream water quality, facilities in the upper and middle James River shall not obtain wasteload allocations or compliance credits from the noted lower James River facilities. This restriction shall not restrict lower James River facilities from obtaining wasteload allocations or compliance credits from upstream facilities.

(5) For new facilities that have not previously discharged, the allocation is effective upon issuance of a Certificate to Operate. For expanding facilities, the allocation is effective as of January 1 of the calendar year immediately following the year in which a Certificate to Operate (or equivalent industrial activity) was issued at the design flow listed above.

C = New facility, loading limit of zero.

Footnotes

(1) In accordance with 9 VAC 25-720.50-C., if allocations for two different design flows are listed above for a given facility, then the allocations for the higher design flows are null and void if a Certificate to Operate at the higher design flow is not issued by 12/31/10.

(2) For new facilities that have not previously discharged, the allocation is effective upon issuance of a Certificate to Operate. For expanding facilities, the allocation is effective as of January 1 of the calendar year immediately following the year in which a Certificate to Operate (or equivalent industrial activity) was issued at the design flow listed above.

LISTING OF DISCHARGERS WITH WASTE LOAD ALLOCATIONS (WLAs) AND DELIVERED ALLOCATIONS (DAs)

Eastern Shore Basin – Total Phosphorus

Facility	Individual VPDES Permit No.	General Permit Registration No.	Design Flow (MGD)	Discharged TP Wasteload Allocation (lbs/yr)	TP Delivery Factor	Delivered TP Wasteload Allocation (lbs/yr)	Limit Effective Date	Basis for Limits	Changes to WQMP Allocations (see footnotes)
Cape Charles WWTP (1)	VA0021288		0.25	228	1.00	228		A	
Cape Charles WWTP (1)	VA0021288		0.50	457	1.00	457	(2)	A	
Onancock WWTP (1)	VA0021253		0.25	228	1.00	228		A	
Onancock WWTP (1)	VA0021253		0.75	685	1.00	685	(2)	A	
Shore Memorial Hospital	VA0027537		0.10	91	1.00	91		A	
Tangier Island WWTP	VA0067423		0.10	91	1.00	91		A	
Tyson Foods-Temperanceville	VA0004049		1.25	1,142	1.00	1,142		A	

Basis for Limits codes (these represent the original basis of the facility WLA and do not reflect trades, netting or bioavailability considerations)

A = WQMP regulation (9 VAC 25-720).

B = Permitted design capacity.

C = New facility, loading limit of zero.
